
ABDUL HADI

AI/ML Intern | Data Science & Machine Learning | Computer Science Student | Web Developer

PROFILE

Computer Science student with a strong foundation in programming and problem-solving. Skilled in Python, Machine Learning, Neural Networks and web development, with hands-on experience in building applications and managing databases. Currently expanding expertise in data science, including data analysis and machine learning concepts. Eager to apply technical skills to real-world challenges and grow in a dynamic tech environment.

EDUCATION

BS Computer Science

University Of Agriculture, Faisalabad

2023-2027

TECHNICAL SKILLS

- Python
 - Pandas
 - NumPy
 - Scikit-learn
 - SQL/MySQL
 - React
 - PyTorch, Statsmodels, NLTK
 - TensorFlow/Keras
 - Data Structure & Algorithms
-

Projects

Project Task Management

- Create and manage projects
- Assign tasks and projects to team members
- Invite members to specific projects
- User and role management (Admin & custom permissions)
- Real-time project and task status tracking

- Secure authentication using Clerk
- PostgreSQL (Neon) with Prisma ORM
- Background jobs, workflows, and cleanup tasks using Inngest

GitHub: <https://github.com/abdulhadi-mlk/responsive-task-management>

House Price Prediction using regression techniques

- Built a House Price Prediction project using a Kaggle housing dataset and regression techniques to estimate property prices from different features.
- Cleaned and prepared the dataset by handling missing values, exploring the data, encoding categorical features, and studying the factors that influence house prices.
- Trained and compared different regression models and evaluated their performance using RMSE, MAE, and R^2 score to identify the most suitable model.
- Performed feature engineering and model tuning to improve prediction results and used feature importance to understand which factors had the greatest impact on house prices.

AI Recruitment Screening Assistant

- Developed an AI-based Recruitment Screening Assistant that analyzes resumes and job descriptions to extract, normalize, and match candidate skills with job requirements using NLP techniques.
- Implemented keyword matching, weighted skill scoring, and TF-IDF with cosine similarity to calculate candidate-job match scores and identify relevant candidates.
- Built an explainable screening pipeline that highlights matched and missing skills, helping recruiters quickly evaluate candidate suitability for a specific role.

Food Ordering App

- Developed a modern Food Ordering Android application.
- Implemented user authentication system with login/signup functionality and splash screen for enhanced user experience.
- Designed features including Add to Cart, order management, and secure card/payment detail handling.
- Created a user profile module where users can view and update their personal information dynamically.
- Integrated Firebase Realtime Database/Firestore for storing user data, authentication, cart details, and app content efficiently.

Experience

- Internship at Edify College of IT as MERN Developer (4 Months)
 - Internship at Safex Solution [AI/ML]
-

Soft Skills

- Problem Solving
 - Teamwork
 - Communication
 - Time Management
-
